PYTHON & AI PROFILE

Python developer with 3.5+ years building production-grade backend systems, AI-integrated platforms, and async data pipelines. Hands-on experience shipping AI avatar generation, real-time AI-styled QR engines, and ML-assisted media processing using Python, Django, Celery, Redis, OpenCV, and FFmpeg. Comfortable taking AI features from prototype to production — including REST API design, OAuth security, and cloud deployment on Linux/AWS.

CORE SKILLS

Python & AI Stack:

Python 3.x | Django / DRF | Celery + Redis | OpenCV | FFmpeg | REST APIs | Async Pipelines

AI / ML & DevOps:

AI Integration | OAuth 2.0 / JWT | PostgreSQL | AWS S3 | Nginx / Gunicorn | Microservices | Git / GitHub

Also skilled in:

PHP (Laravel, CodeIgniter) · JavaScript (ES6+, WebSockets) · WhatsApp API · Razorpay / PhonePe · RBAC & Multi-tenancy · Linux server management

EXPERIENCE

Python / Backend Developer · VMS Techs, Noida — *Aug 2022 – Present (3+ yrs)*

- Built AI avatar generation app (Django + OAuth 2.0 + Razorpay) that applies AI-driven styling to user photos; Redis caching cut load time **30% in production.**
- Engineered Qrtli — a real-time AI QR styling engine using a **Python microservice** bridged with Laravel, delivering dynamic AI-generated QR codes at scale with PhonePe payments.
- Developed server-side **FFmpeg + OpenCV pipelines** for automated video processing, dynamic image manipulation, and media transcoding at production scale.
- Designed async media upload system (Django + Celery + Redis) handling concurrent large-file uploads with **zero main-thread blocking** under peak load.
- Integrated **WhatsApp Business API + Google Calendar/Meet** to automate appointment booking — replacing manual scheduling workflows.
- Maintained Linux production stack (Nginx, Gunicorn, Supervisor, AWS S3) with automated deployment scripts and structured log monitoring.

AI & PYTHON PROJECTS

Dojiwa — AI Avatar Platform

Python · Django · OpenCV · Redis · OAuth 2.0 · Razorpay

AI-powered avatar generation with social login, subscription billing, and Redis caching. 30% faster page loads in production.

Qrtli — Real-Time AI QR Engine

Python Microservice · Laravel · MySQL · PhonePe · WebSockets

Python microservice delivers AI-styled QR codes in real time via a Laravel bridge. Integrated WhatsApp notifications and payment gateway.

SnapCut — Async Media Pipeline

Django · Celery · Redis · PostgreSQL · FFmpeg · OpenCV

High throughput async video/image processing with Celery task queues. Zero blocking under concurrent heavy-file workloads.

Appointment Automation — AI Workflow

Django · WhatsApp Business API · Google Calendar API · Celery

AI-assisted booking automation via WhatsApp triggers, Google Meet scheduling, and Celery background workers.

EDUCATION

B.Tech — Electronics & Communication

IIMT College of Engineering, Greater Noida · 2018 – 2022

WHY HIRE ME FOR AI / PYTHON ROLES

- ✓ Production AI features shipped — not just tutorials
- ✓ Async/distributed systems with Celery + Redis at scale
- ✓ CV/media pipelines with OpenCV & FFmpeg
- ✓ Full stack ownership: API → deployment → monitoring
